

SOFTWARE ENGINEERING EXPERIMENTS

DESIGNED BY: M.HASHETHA

REG.NO:192521162

EXPERIMENTS

1. Sketch a Simple Prototype of a Bus Ticket Booking System using Figma Tool
2. The stakeholders have conflicting views on the user interface design for an E-Commerce mobile app. Create a prototype using Figma tool to discuss with the stakeholders to get their feedback and approval.

EXP 1: Sketch a Simple Prototype of a Bus Ticket Booking System using Figma Tool

Aim:

To design and sketch a simple prototype of a Bus Ticket Booking System using Figma, demonstrating the basic user interface and navigation flow for searching buses, selecting seats, entering passenger details, and booking tickets.

Procedure:

1. Open Figma and create a new file.
2. Create a mobile frame for the booking system.
3. Design the Home Page with From, To, Date, and Search Bus.
4. Create a Bus List Page showing available buses and prices.
5. Create a Seat Selection Page with available and booked seats.
6. Create a Passenger Details Page with basic passenger information.
7. Create a Booking Confirmation Page with ticket details.
8. Connect the pages using Prototype interactions.

OUR RESULT:

EXP 2: The stakeholders have conflicting views on the user interface design for an E-Commerce mobile app. Create a prototype using Figma tool to discuss with the stakeholders to get their feedback and approval.

AIM:

To create a prototype of an E-Commerce mobile application using Figma to present different UI design ideas, collect stakeholder feedback, and obtain approval for the final design.

PROCEDURE:

Procedure

1. Open Figma and create a new design file.
2. Create a mobile frame for the E-Commerce app.
3. Design the Home Page with categories, products, and search options.
4. Create Product Details, Cart, and Checkout screens.
5. Add navigation between screens using Prototype interactions.
6. Present the prototype to stakeholders and discuss the different UI designs.
7. Collect their feedback and suggestions.

OUR RESULTS:
